

MOC FP – Forensic Pathology (Mandatory 150-Question Module)

• abdominal blunt trauma	• hippocampal sclerosis
• acute heroin intoxication; toxicology	• hymen anatomy
• aircraft related deaths	• hyoid anatomy and variations
• all terrain vehicle deaths	• hyperglycemia/diabetic ketoacidosis
• ammunition	• hypertensive intracerebral hemorrhage
• anaphylaxis; mast cells	• hyperthermia
• animal bite marks	• hypothermia; gastric ulcers
• aortic dissection	• interstitial emphysema
• Armanni-Epstein lesion	• lightning related deaths
• autopsy technique to prevent artifacts	• liver, benign lesions
• bacterial endocarditis	• medical intervention artifacts; resuscitation
• birth-related injuries	• medical intervention artifacts; intubation
• blunt trauma patterned injuries	• medical intervention artifacts; minocycline
• body packing	• medical intervention artifacts; tetracycline
• bombs and explosions	• Mees lines
• cerebellar vermis atrophy	• meningitis
• cerebral contusion/lacerations	• mitral valve blood cysts; infant
• cerebral infarct	• motor vehicle accident; abdominal blunt trauma
• chemical burns	• myocardial infarct; dating
• chemical injury; inhalants	• neonatal retinal hemorrhages
• chronic alcoholism; nutritional complications	• normal infant CNS anatomy and variations
• CNS arteriovenous malformations	• OTC drug abuse
• CNS cerebrovascular disease	• patterned injuries
• CNS demyelinating diseases	• pedestrian deaths; blunt trauma
• CNS herniation	• pedestrian deaths; patterns of injury
• CNS normal anatomy & variations	• positional asphyxia
• commotio cordis	• postmortem anatomical changes
• costochondral junction anatomy and variations	• postmortem animal activity
• crack cocaine	• postmortem insect activity
• cutaneous electrical injuries	• postmortem redistribution of drugs
• cylinder gap	• postmortem trauma
• diabetic ketoacidosis	• pulmonary infections
• diaper rash	• pulmonary thromboembolism
• digital clubbing	• putrefactive decomposition
• dismemberment	• radiography of gunshot wounds
• drowning; pediatric	• resuscitation artifacts
• ductus arteriosus	• ricochet wounds
• epidural hemorrhage	• rigor mortis
• female genital tract; viral infections	• run over by vehicle; patterns of injury
• female genital variation	• sarcoidosis
• fire/thermal deaths	• separation of cranial sutures
• firearm contact wounds	• sharp injuries (not knife); patterned
• firearm entrance and exit wounds	• sharp injuries; patterned
• firearm injuries; soot deposits	• shotgun wounds; range of fire estimation

• firearm intermediate target wounds	• skull fractures
• Fitz-Hugh-Curtis syndrome	• spontaneous coronary artery dissection
• fluid electrolyte disturbances; dehydration	• stab wounds
• forensic anthropology; fractures	• stippling
• forensic anthropology; non-human remains	• stud gun injuries
• fractures; types	• subarachnoid hemorrhage
• gastric bypass surgery; complications	• sudden death; young athletes
• graze wounds	• suicide stab wounds
• gunpowder stippling	• thermal burns; patterns
• gunshot wound; incapacitation	• toolmark identification
• gunshot wounds; markers of suicide	• traumatic asphyxia
• hemoglobinopathies; sickle cell disease	• venous air embolism
• hesitation marks	• volvulus
